ONE TOURNAMENT.
MULTIPLE FORMATS.

A practical format selector for 16 to 64 players or teams.

Use the number of ENTRANTS, not the number of individual teammates.

WHAT THE OWNER CHOOSES

Entrants + Game mode + Tournament format

IMPORTANT IMPLEMENTATION STATUS

VXSK V17: auto Single Elimination works for power-of-two sizes only.
Double Elimination, Swiss, Groups, BYEs, and multi-stage transitions
are TARGET FEATURES — not production-ready backend capabilities.

PICK THE FORMAT BY GOAL

SINGLE ELIMINATION

Fast event; straightforward bracket.

Ideal for 16, 32 or 64 entrants.

With BYEs it can also support other counts (not built yet).

DOUBLE ELIMINATION

More competitive fairness; allows one early loss.

Longer schedule and more matches; requires lower bracket.

Good for 16 or 32 teams with sufficient staff.

GROUP STAGE → KNOCKOUT

Best if every team should play several games.

Good clean examples: 20 = 4 groups of 5;

32 = 8 groups of 4; 40 = 8 groups of 5; 48 = 8 groups of 6.

SWISS STAGE → KNOCKOUT

Best for many entrants and a competitive qualifier.

Pair comparable records across rounds; avoid rematches.

Odd counts require a BYE rule and careful tie-breakers.

THE TWO MOST COMMON PIPELINES

Groups / Swiss → Qualified entrants → Knockout → Champion

PARTICIPANTS: 16–39

Each line is a recommendation, NOT an automatically required format.

N	SLOTS	BYES	FORMAT / RECOMMENDATION	ADVANCES TO

V18 TEST PACKAGE: WHAT IS ACTUALLY FIXED

View Bracket switches to the visible Brackets tab; empty states show clearly.

Homepage menu consolidates links without removing sections.

Full multi-format generator and arbitrary entrant counts remain open work.
